## PERSONAL PROJECTS

### World Covid Report (08/2021 - 10/2021)

- The app displays key metrics around the growth of coronavirus, including the number of positive cases, negative cases, deaths per day and many more.
- It is a live covid data reporting app based on retrofit api and volley library.

### Meme Share App (10/2021 - 11/2021)

- A Kotlin App where memes will be fetched from Reddit using an API and can be shared using other apps like (WhatsApp, Facebook, etc) to our friends.
- Uses Volley and Glide libraries in this project.

### Quiz App (11/2021 - 01/2022)

- A simple Quiz App that contains a set of curated questions and its answers and checks for the correctness of the answer given by the user and shows result at last.

### Spotify Ui (07/2022 - 08/2022)

- An user interface spotify clone on which current track, songs playlist and podcasts are displayed.

### Study Deck (04/2022 - Present)

- An App for updated links of college website and all semester notes including all branches are present in it.
